

WELCOME TO
OUR WORLD OF
MULTIPLE GREYS

POLYKEMI GROUP

IN OUR WORLD – THINGS ARE NOT ALL BLACK OR WHITE

To make a choice can sometimes be difficult. If the choice needs to be environmentally friendly, sustainable, aesthetically appealing and with a cost awareness, it can be even more difficult. But now and then, it can be really easy to make the right choice. Like with REZYcom – our customer adapted eco-friendly material grade, based completely or partly on recycled plastics. A great opportunity to make a maximum impression with minimal environmental footprint, without any compromises in neither quality nor sustainability. A fact we are very proud of and can put our signatures on – in black and white, even in shades of grey.

make certifications possible.

REZYCOM STRENGTHS

CUSTOM-MADE SHADES OF GREY

The right choice of raw material and extensive experience in coloring of plastics makes it possible for us to offer multiple shades of black and grey, according to customers' requests.

HIGH MECHANICAL PERFORMANCE

Numerous reinforcements are available and different choices provide different mechanical properties for the plastic product. With our experience and knowledge, we are able to make the correct choices, which results in a recycled material comparable to compounds based on virgin raw material.

OPTIMAL PRODUCT LIFESPAN

Rays of sun, strong detergents or high surrounding temperatures can severely shorten the lifespan of plastic products. However, the correct combination of additives makes it possible to optimize its lifetime.

program of sustainable materials
for a sustainable future”*

LONG EXPERIENCE OF SUSTAINABLE PLASTICS

Polykemi Group produces and delivers high quality, sustainable compounds of recycled plastics for injection moulding and extrusion. Apart from the customized program REZYcom, we also have REPRO – our standard range of black recycled plastics. With headquarters in Ystad, Sweden, we have over 50 years of experience of compounding and are represented on three continents.

QUALITY IN – QUALITY OUT

We choose our suppliers and sources of recycled plastics with great care. We evaluate the sources continuously, since quality is of utmost importance to us. We know it takes high quality raw materials to produce and deliver high quality products. And that is something we do. Because we can.
